Classes commence work on Monday next.

The new gymnium will be used for the first time on Monday next by our lady members.

A LECTURE on New Zealand will be given in the Queen's Hall on Monday next by Mr. W. Courtney. Admission free. This gentleman has resided in the colony for thirty-nine years, so that a thoroughly instructive and interesting lecture will, doubtless, be given. It will be illustrated with dissolving views.

THE PEOPLE'S PALACE DAY TECHNICAL SCHOOL CRICKET CLUB.—Owing to the examinations we have been able to do very little with the bat and ball this season. However, we hope to get to work in earnest after the Whitmountide vacation. We have a capital ground at the "Uplands," Walthamstow, which is one mile from St. James' Street Station. Our entrance fee is 3d., and the weekly subscription 1d. The Uplands have generously provided us with a considerable quantity of new apparatus, and if the boys in the school will only show sufficient interest in the sports, Wednesday afternoon will be made a weekly half holiday. Should the weather prove fine on the Wednesday after our return to school (27th inst.), a match will be played at the "Uplands," Masters v. Boys. With the Cricket Club will be incorporated a Quoits Club, Rounders Club, &c.; and any member joining the Cricket Club will have the privilege of playing in these games—for which the Governors will provide all the materials required—at the Uplands. Special matches will also be given to running and jumping. Arrangements have been made with the keeper of Victoria Park for cricket practice four nights per week, viz., Mondays, Tuesdays, Thursdays, and Fridays. Prizes will be given at the end of the season for (1) the best batting average, (2) best bowling analysis, and (3) best fielding. It is sincerely to be hoped that the boys of the day school will take every advantage of the opportunities which are now offered them for healthy and manly recreation. We shall be very glad to hear from suitable clubs with the object of arranging matches, as our list of fixtures for the season is not quite full. Our average age is fourteen years.

E. H. SMITH.

THE GREAT EASTERN RAILWAY COMPANY have very kindly offered return tickets for our boys under fourteen, to St. James' Street Station from Bethnal Green for twopenny, or from London Fields three-halfpence; these tickets will be on sale in the office and are only available for students travelling to attend the recreation grounds. Students of our evening classes will be charged fourpence and threepence respectively, on the same conditions.

C. E. OSBORN.

SOCIETY OF ARTS EXAMINATIONS, 1891.—The lists of successful students in the recent examination are just to hand, but too late for this week's issue. They will appear, however, in next week's journal. We have secured the Society's Bronze Medal and 10 first class, 31 second class, and 39 third class certificates in Book-keeping; one each second and third in French; and one each third in Arithmetic. —The List can be had by applying in the office.

PEOPLE'S PALACE RAMBLING CLUB.—The ramble to Windsor, on Whit-Monday, was abandoned in consequence of the weather. The prospective arrangements are as follows:

On Saturday, May 23rd, meet at Coborn Road Station, at 3.45, book to Snaresbrook for ramble to Mrs. Guy's, Buckhurst Hill.

May 30th, meet at Coborn Road, at 3.10, and take return tickets to Loughton, for ramble to Theydon Bois. Mr. H. Roseway will act as leader.

June 6th, Woodford meet.
June 12th, Billericay.
June 20th, Croxydon and Crowhurst.
June 27th (weather favourable), Boating Ramble.

Mr. OSBORN has received the following letter from our gymnasts in Sweden. It will doubtless be read with interest by all our members:

May 14th.

DEAR SIR,—Our trip has been made under exceptional circumstances; exceptional, because not only was the accommodation on board the "Thorstein" good, the fare splendid, and everything done that could be done by the captain and officers to make us comfortable, but, in addition to all this,
Technical Words

A question which seems to be exercising a few in the present day is how to spend it for the general good. The great thesauruses of the world are in great demand, and it seems that to bestow them is the duty of every citizen. The question of the power and price of the force is no less important. It is clear that if we are to build a new world, we must have a new force. The question of the direction and control of the force is another. It is clear that if we are to build a new world, we must have a new direction. The question of the machinery and maintenance of the force is another. It is clear that if we are to build a new world, we must have a new machinery.

The City Guilds do not, however, propose this change in order to withhold their support from the manufacturers, but rather to extend the scope of their operations. They propose the extension of technical education and the continuance of the power and price of the force. They propose that the machinery and maintenance of the force should be extended. They propose that the direction and control of the force should be extended.

The appearance of the earliest advertisements dates back to 1612, when the London Gazette and the Weekly Journal were founded. These newspapers were not only news sources but also vehicles for advertising. The first advertisements were short and simple, often consisting of a single line or two lines. They were placed in newspapers and other publications to attract attention to goods and services. Over time, advertising evolved from simple text to more complex graphics and multi-page spreads. The first advertisements were often used to promote products and services directly, but as the field of advertising grew, it became more sophisticated and creative. Today, advertising is a multi-billion dollar industry that reaches millions of people every day.

The orchard snow was falling fast

And I would come when evening shadows throng,

And through thy dreamful fancy would I glide,

And the corn is green again;

And the soft clasp of your hand,

And your dear eyes would love to linger there.

And fan thy brow and flutter to thy feet.

As true, as tried as ours.

But absence only strengthens love,

And fan thy brow and flutter to thy feet.

And creep into thy heart and abide there.

And fan thy brow and flutter to thy feet.

As true, as tried as ours.

But absence only strengthens love,
