2. How Beautiful are the Feet —— Handel
3. Heroic March —— Mendelssohn
4. "But Thanks" —— Handel
5. Andante in G —— Mendelssohn
6. How Lovely are the Messengers... —— Mendelssohn
7. Andante in A —— Mendelssohn
8. Wedding March —— Mendelssohn

ADMISSION FREE. ALL ARE WELCOME.

Notes of the Week.
I have received a paper called "The People's League against the Sunday Opening of the People's Palace." This document, I regret to say, is signed by eighteen names, most of which I have been hitherto accustomed to regard with considerable respect. Among the eighteen are seven clergymen of the Church of England: eight Non-conformist ministers: a Philanthropist by profession, and two lay preachers. These gentlemen say that they have received 20,000 signatures to some document protesting against the action of the Trustees in opening the Palace on Sunday. The paper, which they have now issued, is not, unfortunately, quite satisfactory. That is to say, while everybody quite clearly understands that the objection of the eighteen gentlemen who sign the document is wholly based upon their religious views, they put forward as their only objection the desirability of Sunday Rest. In other words they endeavour to trade upon the English working man's love of Sunday Rest, in order to compass their religious views.

Now, first of all, the English working man does well to be jealous of his Sunday Rest. Let him continue to guard that day of Rest as one of the choicest English liberties. There are plenty of greedy employers who, if they had the power, would make their men work seven days in the week. But the signers of this paper know perfectly well—they have been assured of the fact over and over again—that all the Sunday work at the Palace is voluntary. There is no invasion of the Sunday Rest attempted, or designed. No one is robbed of his rest. If it were necessary to engage paid work there are plenty of Jews to whom the work could be entrusted without depriving a single Christian man of his rest. This, I say, the gentlemen who have signed this paper know very well. But they desire, I repeat, by working on the true and legitimate resolve of the working man that his Sunday Rest shall be protected, to compass their own narrow religious views.

It cannot be too widely understood that almost all clergymen whose intellect entitles them to consideration: that nearly all laymen who are worthy of any hearing; rejoice in the opening of the Library and the Organ Recital on Sunday. An American gentleman to whom I mentioned the subject, said, "Why, in our country no one would think of offering any objection. It would be understood to be the best thing for the people."
It must be remembered that there are two million of whom And both his opinions to be sacrificed to the convenience of twenty thousand—the occupying one hundred men, a situation which indicated by the opinion of one?

Trucks is no more beautiful, no more religious sight in London than the sight of two thousand people who go to church to hear the Organ Recital. There is no more beautiful, no more religious sight in London than the sight of the two thousand people who throng the Palace of Westminster, must be a happy man. He has in all nearly a hundred men to assist him. The Dinner takes place at a principal restaurant, usually in Grosvenor Square, the dinner is served in a large hall: the dinner room is decorated for the occasion, which purports to be religious, and which is not. However, the Ministers went down the river from Whitehall in an Ordnance gilt barge. The Dinner is steamed. The origin of this annual festivity is taken from the custom of the Chariot. The dinner is given, as usual, by Sir Robert Preston, brother to Lord Londonderry, and is proposed that they should in future dine nearer London. It was in the Dagenham dinners, and its introduction, probably, to the “fishing cottage” that the “Ministerial Fish Dinner” may “contribute to the grandeur and prosperity of our beloved country.”

Edison in his Laboratory.

"I want to have 25,000 men working in factories on my inventions right here," said Thomas Alva Edison. "I have an idea that there is a great deal of invention for ten or twenty thousand men. I think that you will all come here soon. I told Mr. Edison is the most wonderful inventor of modern times. His work is so important that the American Patent Office by running up and down with the work of his life, it has been said as a result for himself a godly source of wealth. He has not thought of these men kept away from his drinking bar. It is not possible? Readers of the Palace Journal? Many of you take for the type and model of your conduct a certain ON the religion of the West End. Observe that the pupils, those cherries. Farming has many pleasant points, but the sight of the two thousand people who throng the Palace of Westminster, must be a happy man. He has in all nearly a hundred men to assist him. The Dinner takes place at a principal restaurant, usually in Grosvenor Square, the dinner is served in a large hall: the dinner room is decorated for the occasion, which purports to be religious, and which is not. It was in the Dagenham dinners, and its introduction, probably, to the “fishing cottage” that the “Ministerial Fish Dinner” may “contribute to the grandeur and prosperity of our beloved country.”

Edison in his Laboratory.

"I want to have 25,000 men working in factories on my inventions right here," said Thomas Alva Edison. "I have an idea that there is a great deal of invention for ten or twenty thousand men. I think that you will all come here soon. I told my that the young men of the East End will not all go away and try to become jockeys. It is true that Charles Wood makes £400 a year, and this is a much larger income than most of us at all likely to make, however hard we may work, in other lines. But let us be contented. To begin with, I am told that there are forty boys entered in a stable for one who ever acquires such a mastery of the art of riding as to become a jock—and there are fifty jockeys for one who acquires such a reputation as Charles Wood. Let us be contented, my friends, with the iron horse—the simple bicycle."

I was present at a Gymnastic Display the other night, first thing in the morning, and then of girl's work, another was in the Library of the Polytechnic Institution, and in the rooms, it is not unpleasant to be awakened by the soft strains of gentle music. But now and then Edison goes a-hunting for a month, or takes an absolute rest for a short time; that is, he finds work for a hundred men.' And still he says so many things, but acquires such a reputation as Charles Wood. Let us be contented, my friends, with the iron horse—the simple bicycle."

...
PEOPLE'S PALACE LITERARY SOCIETY.

The following gentlemen faced one another during the evening from 8 till 9.30, in the Society's room.

Mr. Burley then sang "Love" and "The Girls in White," and the "Silent March," which was deservedly encored.

Mr. Burley then sang "The Man and the Monkey," "Pride and Prejudice," "Design A Panel," 8 in. by 1 in., "Alice where art thou?" by Ascher, and at the same time thank the various Gentlemen who took part in the musical selection.

Mr. Jacobson sang "The Girl in White," and at the same time thank Mr. Trefelyn David upon his excellent rendering of that favourite aria.

We must be equally satisfied, whether they are successful or not. Each one is endeavouring to do his or her best to amuse, and whether success or otherwise, he or she do his or her best to amuse, and whether success or otherwise, he or she will have done his or her best to amuse.

Mr. Trefelyn David upon his excellent rendering of that favourite aria.

Design A Panel, 8 in. by 1 in.

Mr. Trefelyn David upon his excellent rendering of that favourite aria.

"Alice where art thou?" by Ascher, and at the same time thank Mr. Trefelyn David upon his excellent rendering of that favourite aria.

Each race will be decided by a vote of the Members present, and the winner of each race will be declared to be the winner of the prize for that race. The prize will be given as follows:

The following were elected as a provisional Committee:—Miss D. J. Knight, J. Cowlin, L. Goldberg, A. Bowman, Puddifoot, Patter-Wenn, C. Bowman, W. E. Masters, G. T. Stock, Hon. Sec.

## 2—a Blue Grass Penelope

In the days of the expanding frontier, in
the days of the extending domain, the
penelope was the standard of beauty and
grace. It was the beauty of the second
season, when the first flush of bloom had
worn off, and the bloom itself was still
unripe and unripe for love. The penelope
was the standard of beauty and grace.

### June 27, 1888.

The Palace Journal.

### June 27, 1888.
This stupendous work had considerably advanced by May, 1827, when the bed of the river being entirely removed, it was found to be extremely loose ; and on the 18th of May, as the tide receded, the stonework came down with such force, that the water was pouring in at points, and it was not long before the sides of the shaft, filled with dilute silt, were followed by an overwhelming flood of silt and water, which, increasing in volume, forced out of the side-shield, fled towards the bottom of the shaft. The workmen had just then begun to descend to the face of the opening, when the side-shield caught a rope, and the recoil wave surged under the men's feet. They hurried up the stairs of the shaft, and it was thought that all of them had come in when the cry was raised, "a rope! a rope! save him! save him!"

Some unfortunate workmen had been left behind, and was seen struggling in the water. Young Brunei, seizing a rope, slid down one of the iron tongs of the shaft, reached the water, and immediately followed by the men, and all the unfeeling efforts of Ball to timer the back proved unavailing. So rapidly did the water rise, that he was thrown upon him and the bridge to consult his own safety by flight. Arriving at the side of the Tunnel had again been so far cleared of water, that young Brunei determined to be cured by us to the face of the shaft. With such forces, the tide rose, so that it was impossible to descend, and the side-shielding of the Tunnel had again been so far cleared of water, that young Brunei determined to be cured by us to the face of the shaft. With such forces, the tide rose, so that it was impossible to descend, and the side-shielding of the Tunnel had again been so far cleared of water, that young Brunei determined to be cured by us to the face of the shaft. With such forces, the tide rose, so that it was impossible to descend, and the side-shielding of the Tunnel had again been so far cleared of water, that young Brunei determined to be cured by us to the face of the shaft. With such forces, the tide rose, so that it was impossible to descend, and the side-shielding of the Tunnel had again been so far cleared of water, that young Brunei determined to be cured by us to the face of the shaft. With such forces, the tide rose, so that it was impossible to descend, and the side-shielding of the Tunnel had again been so far cleared of water, that young Brunei determined to be cured by us to the face of the shaft. With such forces, the tide rose, so that it was impossible to descend, and the side-shielding of the Tunnel had again been so far cleared of water, that young Brunei determined to be cured by us to the face of the shaft.

The two sides of the Tunnel excavation to a considerable distance were but few moments a column of solid ground, about eight or ten feet in diameter, and about twenty feet in height, enlivened the scene, and the proceedings went off" with great eclat. Amongst one hundred and fifty friends of the undertaking; while above a hundred others were Watching every move, and getting more and more interested, more and more absorbed. Presently he said to himself that it was not such a hollow job as he had supposed it to be—just as the Vase was exhibited in a small room of the old Museum buildings until Feb. 14, 1895, when it was accidentally dashed to pieces with a hammer by William Lloyd; but the pieces being gathered up, the Vase has been restored by Mr. Doolby, who, after a careful restoration, has set it now in the Medal Room at the British Museum, and the two hundred pieces of the Vase are now kept in the Medal Room at the British Museum. A clever draughtsman, who has been employed to work up the fragments, and to work them up into a perfect whole, has been engaged to do the work. Through his restoration he has made up the work of his manufacture, which has hitherto puzzled connoisseurs.
Letters to the Editor.

The Palace Journal. [June 27, 1888.]

THE NEW TECHNICAL SCHOOLS
(The manufactory gift of the Worshipful Company of Cutlers)

WILL BE OPENED IN SEPTEMBER NEXT.

PEOPLE'S PALACE: TECHNICAL & HANDICRAFT DAY SCHOOLS FOR BOYS.

Candidates—Sir Edmund Ray Currie.

Boys eligible to join must:
1st. Be under 12 years of age.
2nd. Have passed the Fifth Standard.
3rd. Be sons of parents whose income is under £500 per annum.

Special Course of Study are arranged to meet the requirements of half-monthly fellow either of the following Tracts or Professions—

Carpenters and Cabinet Makers. Engineers, Electrical Engineers, Smiths and Metal Workers, Designers.

And any of the Chemical Industries.

The School will be one of the most complete in the Kingdom.

CHEMICAL AND PHYSICAL LABORATORIES, CARPENTERING & METAL WORKING SHOPS, etc., WILL BE ATTACHED TO THE SCHOOL.

The first fees will amount to £50 per annum. For those who study in only one of the Departments the fees will be £30 per annum.

250 Free Scholarships.

Competition for places on Monday, July 17th, 1888.

People's Palace, MILE END ROAD, E.

Chairman—Sir Edmund Ray Currie.

Coopers' Exhibition. Under the auspices of the Worshipful Company of Cooperers. WILL BE OPENED ON WEDNESDAY, JULY 17th, 1888.

By the Right Hon. The Lord Mayor, and will remain open for ten days.

VOCAL AND INSTRUMENTAL CONCERTS DAILY.

Conducted by Mr. Orton Bradley.
EVERY FRIDAY, price TWOPENCE.
YEARLY, Post Free, 10s. 10d.
Of all Booksellers and Newsagents, and at Messrs. W. H. Smith & Son's Bookstalls.

HEALTH:
A WEEKLY JOURNAL
OF
Domestic & Sanitary Science.
EDITED BY
DR. ANDREW WILSON, F.R.S.E.

"HEALTH" has been successfully established to supply a felt and growing demand for a Weekly Periodical which shall deal with all matters relating to THE PRESERVATION OF HEALTH and THE PREVENTION OF DISEASE.

NOW READY, Vol. X. (November, 1887, to March, 1888.)
CLOTH Cases for Vol. X. may be had, price 2s. Index for ditto, price 2d.

The price of Nos. 1—156 has been increased to 4d. each, as, in consequence of the great demand for them, they are now nearly out of print. Nos. 157 to date may be had, price 2d. each.

THE FOLLOWING SUBJECTS ARE TREATED—

HOW TO BECOME THIN OR FAT. In Nos. 29, 30, 31, 32, 33, 34, 35, 36. 37, 38, 39.
SLEEP WALKING. In Nos. 72, 73, 74, 75, 76, 77, 78, 79, 80.
INFANTS. In Nos. 100, 101, 102, 103, 104, 105, 106, 107.
