5. Selection of airs from Mendelssohn’satorio “Elijah”...Mendelssohn.
6. Fugue on the motto Bach, No. 7...Schumann.
7. “There is a green hill far away”...Gounod.
8. March in G...Smart.

ADMISSION FREE. ALL ARE WELCOME.

Notes of the Week.

Considering what is now said of the vast importation of starving foreigners into London, read what the Americans think and say of the invasion of their country by men who run down the pay of industry.

“What difference does it make to the American working man whether the cheap labour of Europe is brought over here under contract to work for 60 to 60 cents a day, or, having been drummed up by immigration societies in Europe, gets over here the best way it can— singly, by families, and battalions—and then accepts any sort of employment at from 40 to 60 cents per day? Is not the result the same? The fact that the labour market is overcrowded at the bottom tells the whole story of wage reduction. The supply of a certain sort of labour is greater than the demand, and the effect is felt upon the whole market.

“Since 1880 over 200,000 Italians have arrived at Castle Garden. Last year the Italian invasion reached the startling figures of 44,274, and for the first five and a half months of 1888 it had exceeded all precedent, amounting to 34,439. The Chinese immigration never, in its most threatening influx, approached in numerical extent the inundation of this demoralizing flood of Italian paupers. Other European states also furnish their quota to glut the American labour market.

“It is all very well for capitalists and philanthropists to sit back and applaud or encourage this immigration. The manufacturer may want cheap labour, and the humanitarian may say that the right of migration should not be restricted. Andrew Carnegie may write of the Triumphant Democracy and the glories of protection for American interests. But the facts remain that the American working men and their children have a heritage in the labour market of this new world; the law of self-preservation will override any transcendental nonsense about the rights of migration, and the American working man will yet open his eyes to the lesson taught by Mr. Andrew Carnegie in increasing the hours of his labour from eight to ten a day, and employing alien working men when his employes refuse to work the long hours for the short pay.

“Speaking of the rising tide of Italian immigration, Mayor Hewitt last week declared that "there is a system of slavery in our midst maintained by Italian padrones, who are bringing the whole Kingdom of Italy over and setting them up in the fruit business. It is as bad as the Chinese Six Companies, of San Francisco, who own slaves—body and soul. I want the co-operation of the press and the people with me on this project (of excluding them for sanitary reasons), for this frightful danger ought to be stopped at once."

“It is not in tariff legislation that American labour demands protection. It is in the restriction of immigration. There was a time when this Republic needed people. The time has now come when, in the interest of its present inhabitants and their posterity, it needs protection against more people. We have had the sediment of Europe’s blood long enough; suppose we now demand to have its best blood or none?”

With respect to the American Republic, let us keep our best blood for home consumption. It is instructive, however, to find that the Americans are waking up at last to the conviction that their great country does not exist in order that Companies may make money by getting foreign labour cheap, but for the welfare of their own citizens. And again; that it does not exist in order to advance the interests of the Irish.

The Palace Journal. [July 25, 1888.]

ROUNDTABLE PARTY.—President, Benjamin Harrison of Indiana; Vice-President, Mrs. M. M. Moon of New York. Democratic Party.—President, Grover Cleveland of New York. Vice-President, Allen S. Thomas of Ohio. Prohibition Party.—President, Clinton R. Fillmore of New Hampshire; Directors, E. F. Cummings of Missouri. Republican Party.—President, A. J. Steevens of Illinois; Director, H. E. Cartwright of Missouri. United Labor Party.—President, Robert B. Conway of Illinois; Directors, Edward S.が多く of Kansas. Industrial Reform Party.—President, Albert E. Redstock of New Jersey; Director, W. L. Thompson of California. Woman Suffragists.—President, Belva A. Lockwood of Washington, D.C.; Vice-President, Alfred H. Love of Iowa. Of the London Trades' Council: the Directors have coining in every year. And most of these men are artisans who are not members of the Justices of the Supreme Court? We like to hurrah of the day, and are not sufficiently cognizant of the actions of the Congress are condensed, and in many papers are banished leaves all questions to the politicians. In England the papers have not at all of whose citizens took an intense interest in politics. We may take this lesson home to ourselves.

India has many points of attraction considered as a place of residence. Partly on the most attractive features is that, in a country where one is continually liable to be eaten up by wild beasts, if one is abroad, or killed by the United States presented the spectacle of a great country—"where every man, but Americans know less about public affairs than almost any other nation. The English read all the debates in Parliament, and carefully study all questions. They know all their Members by name, and almost personally acquainted with the leaders in the House of Commons. Every four years the American is inquired of the man who is what he is by a special election; but unless a man is born to have a special election, he passes the voting period for very little attention to public affairs, and more especially to questions of real importance. In India, where all the proceedings of Parliament are recorded, and in many papers are banished leaves all questions to the politicians. In England the papers have not cognizant of the actions of the Congress are condensed, and in many papers are banished leaves all questions to the politicians. In England the papers have not at all of whose citizens took an intense interest in politics. We may take this lesson home to ourselves. INDUSTRIAL REFORM PARTY.—President, Albert E. ... and boarded their prize. The revenue men looked at each other and laughed, but the smugglers were not to be outwitted. They unhooked the main Sheet and hove it about, and away they sailed. The whole of her cargo was gone. Not one bag left; not a single trace of anything at all; the prize searched, turned upside down, and searched again, but nothing could be found. The men looked at each other aspher, it had been grieved to most of them to arrest a fellow who had lived honest and steady all his life, and who wanted a little cheaper spirit; but this insidious regurgenation to perform the more ungrateful task was moderated by the prospect of a prize. The Dancing Polly as she stood with her cargo plundered, her crew dispersed, and no dead body on board. And then there was the beautility. They looked at each other in dismay. Where was it? Without a word they turned and climbed the hill to the farm. Hardly one went upstairs and left my sleep out.

"I believe," said the justice, "you wish to come down and show me the farm.

"Yes, sir," said Daniel Gulliver. "I have been here twice already, and I am about to go again."

"Very well," said the justice. "I shall come with you."

They went down the hill and entered the farm. The whole of the farm was deserted. There was nothing there.

"I wonder what has happened," said Will. "Perhaps they have gone to the coast to get more barnacles.

"No, sir," said Daniel Gulliver. "I am sure they have not."

"Then what is the matter?"

"I think," said Daniel Gulliver, "that the goods have all disappeared."

"Well they may," said another.

"But the men are not there," said Daniel Gulliver.

"Then they must have gone to the coast to get more barnacles," said another.

"I think," said Daniel Gulliver, "that the goods have all disappeared, and the men are not there."
From a Falkland Islander.

I have been in England only a few weeks, having arrived from the Falkland Islands, where I have been occupying
the sights of London; and very wonderful they are to me. All
that I know of London, except what I have heard of or
have seen since my arrival, is comprised in the hazy and
confused recollections of my boyhood; and the only feature of
the good. The taxes are practically nil, the duty on im-
ported liquors supplying more than sufficient revenue; our
exports more than double our imports in value. The Falkland
Islands, numbering about 1,000, are adding to their wealth,
in the surplus of sheep over those sent to England for the
next 10 years. This would be largely increased if we could
sell more of our beef and mutton in close proximity to the
surplus sheep than boil them down for tallow. Some years
ago the experiment of sending frozen mutton to England was
made. It was too expensive for extravagance and mismanagement.
We are thinking of beginning again, on a somewhat less
scale. The time taken on the voyage being so great a deterrent,
we have passed European powers who have passed European
powers who have passed European powers.

Thirty years ago there was a great rush to the Falklands.
My father was attracted by the Falkland Islands. Glowing
accounts were given of their fertility and salubrity, and
rich specimens of Falkland grass, which were shown about.
So the Falklands my father soon took, with him, among other belongings, myself. There he died, and there I
have ever since lived. I make no complaint, but the Falk-
lands were not what my father expected to find them. They
contain scarcely an acre of arable land. What is not sheer
rock is covered with herbage so scanty that three acres are
only sufficient to maintain one sheep. There is not a trace
of any kind of mineral. The climate is cold and boisterous,
but there is no such thing as a cold wind. Here you can
see any one falling into it and having but a poor
chance of escape. We frequently see large icebergs float­ing
in our neighborhood, and are able to cover enormous
tracks, often precipitous and frequently boggy. We have
neither coal nor wood; our fuel is mainly peat. Those who
explains why trees are a novelty to me. Practically all our
lands were not what my father expected to find them. They
contain scarcely an acre of arable land. What is not sheer
rock is covered with herbage so scanty that three acres are
only sufficient to maintain one sheep. There is not a trace
of any kind of mineral. The climate is cold and boisterous,
but there is no such thing as a cold wind. Here you can
see any one falling into it and having but a poor
chance of escape. We frequently see large icebergs float­ing
in our neighborhood, and are able to cover enormous
