METROPOLITAN HOSPITAL,
KINGSLAND ROAD, E.

Chairman—JOHN FRY, ESQ.
Vice-President—SIR EDMUND HAY CURRISS.

THE NEW BUILDING FOR 160 BEDS IS NOW COMPLETE. Accidents and cases of urgency admitted at all hours free.

The Hospital is conducted on strictly provident principles.

THE CHARITY HAS NO ENDOWMENT.

Every one should visit Epping Forest, London's great health resort, only half-an-hour from the city.

THE ROYAL FOREST HOTEL,
CHINGFORD.

Charmingly situated in the Forest, close to Queen Elizabeth's Hunting Lodge, the Connaught Waters, and the Green Ride. It is the key to all the principal places of interest in the Forest, including the British and Roman encampments of Boadicea and Suetonius Paulinus. There are special attractions in the Forest during all seasons of the year. Nightingale and other birds abound.

The Hotel contains about sixty rooms available for guests. Residents will find the greatest comfort at a very moderate tariff.

NINE TENNIS LAWNS, BOWLING GREEN, HARD TENNIS COURT, QUOITS, CROQUET, &c. The hotel contains about sixty rooms available for guests. Residents will find the greatest comfort at a very moderate tariff. The hotel has a reputation for its wedding breakfasts, for which it possesses unusual facilities.

THE NEW QUEEN'S PAVILION

Will be ready for occupation on the first day of July. Will contain thirty rooms, and will be let at a very moderate price. The hotel has a reputation for its wedding breakfasts, for which it possesses unusual facilities.

BIRKBECK BANK,
Southampton Buildings, Chancery Lane.

Established 1851.

Savings Department. The bank has made a large extension to its premises, and will be able to accommodate a large number of depositors. The bank is conducted on strictly provident principles.

The bank has a reputation for its wedding breakfasts, for which it possesses unusual facilities.

Applications for advertisements in the "Palace Journal" to be made to SMITH & HEYWOOD, 6, Eldon St., Finsbury, E.C.

**WEDNESDAY, May 22nd.** 7 to 10 p.m., in Exhibition-buildings, Botanic Chemistry.

**Saturday, May 24th.** Practical Inorganic Chemistry.

**SCIENCE AND ART EXAMINATIONS.**

**May 22nd.** 7 to 10 p.m., in Exhibition-buildings, Botanic Chemistry.

**May 24th.** Practical Inorganic Chemistry.

**THERE will be a public examination of the Day School and some of the Evening Classes. The papers will be administered by the Proprietors, and the results published in due course.**

The Examination Committee and the Examining Staff...
PEOPLE'S PALACE RAMBLING CLUB

On Saturday next, the 24th inst., there will not be any ramble, as on that day there will be a very enjoyable one. The Society will be at the Palace at 2 p.m., and will depart for Greenwich on the railway, where they will take the steamer for the island.

PEOPLE'S PALACE SHORTHAND SOCIETY

The Society will meet next on Tuesday, May 22nd, at 8 p.m., at Palace Hall. Any registered students desiring to join the Society will be required to produce a certificate of attendance at the examination conducted by the Palace School. A.C. F. WHITING, Hon. Sec.

PEOPLE'S PALACE CHORAL SOCIETY

Gentlemen wishing to join the Society can obtain all necessary information from T. W. MORSE, Hon. Sec. W. G. COLLINS, Hon. Lib.

PEOPLE'S PALACE OLD BOYS' CRICKET CLUB

The next match will be against the Palace Cricket Club. The selection of the team will be made by the captain, and all members are requested to attend the meeting on Tuesday, May 22nd, at 8 p.m., at Palace Hall. A. W. H. BURRELL, Capt. 2nd. Corps.

PEOPLE'S PALACE GIRLS' JUNIOR

The next match will be against the Palace Cricket Club. The selection of the team will be made by the captain, and all members are requested to attend the meeting on Tuesday, May 22nd, at 8 p.m., at Palace Hall. A. W. H. BURRELL, Capt. 2nd. Corps.

PEOPLE'S PALACE TENNIS CLUB

The next match will be against the Palace Cricket Club. The selection of the team will be made by the captain, and all members are requested to attend the meeting on Tuesday, May 22nd, at 8 p.m., at Palace Hall. A. W. H. BURRELL, Capt. 2nd. Corps.

BUILDING CONSTRUCTION CLUB

On Thursday, 8th May, a very interesting ceremony took place in the Hall of Building Construction, when a number of very handsome books were presented to the teacher. Mr. J. P. H. Bostock, who was present, said that the books were presented by the Students of the Building Construction Club. Mr. S. F. Bird, who was present, said that the books were presented by the Students of the Building Construction Club.

Christmas Numbers

The ordinary mass of readers regard the Christmas numbers as nothing less than the triumph of the pen and pencil. The story is replete with the most extravagant and fanciful ideas, and is the delight of the young and old. The ordinary mass of readers regard the Christmas numbers as nothing less than the triumph of the pen and pencil. The story is replete with the most extravagant and fanciful ideas, and is the delight of the young and old.

PEOPLE'S PALACE JUNIOR SECTION

The new season is about to open, and the Club will be held at the Palace School, under the charge of Mr. F. S. Phipps, who will practice in the Victoria Park tennis courts.

PEOPLE'S PALACE JUNIOR CRICKET CLUB

The new season is about to open, and the Club will be held at the Palace School, under the charge of Mr. F. S. Phipps, who will practice in the Victoria Park tennis courts.

GREENWICH WEATHER REPORT

We received the rainfall and were very interested in the many beautiful pictures which we saw. The two we found most interesting were those in front of the Royal Observatory, and by the Clock Tower. Another splendid picture was the "Desertion of French Ally on the Continent," by Sir J. M. W. Turner. The Society will meet next on Tuesday, May 22nd, at 8 p.m., at Palace Hall. A. W. H. BURRELL, Capt. 2nd. Corps.

Comic Duet—"Tale of Woe."

Stump Odash—"Was it by Chance or Failure?"

Pathetic Ballad—"White Wines Weep for You."

Cornet Solo—"Lost Chord"

To Conclude with a Laughable Sketch—By the Company.
The Unparalleled Adventure of One Ibans Pfaall

By EDOUARD.MOLLAT

Moby Dick was not the only white whale of the sea, at an angle of about forty-five degrees; but it must not be understood that I was only half-lying below the perpendicular. So far from it, I still lay on the poop, watching the wheels of the procession; the change of situation which I had acquired forced me back to the position, which was accordingly one of the best for the situation of my eyes. When I had a fair view of the position, and the form of the object in question, I was struck by the fact that when I fell into the ocean, the water was not the color of my hair, but the color of my vessels of my head and throat, which had hitherto buoyed up my spirits with delirium, had now begun to retire. The long-desired rim, I writhed my person over it, and fell in the ocean lay a small black object, "Mly oblong in shape, myself sufficiently to attend to the ordinary cares of the ship, I saw nothing but the ocean and the sky, and the finding it, to my great relief, uninjured. My implements were of great and three-quarters miles. Immediately beneath the eye of the moon's orbit being an ellipse of eccentricity amounting to no less than 0.05484.

The moon's actual distance from the earth was the first step in the study of that phenomenon which is called the "crater" or "star" of the moon, and which appears to be caused by the reflection of light from the imperfect and broken surface of the moon. The first step is to calculate the distance of the moon from the earth, and this is done by finding the mean or average interval of the moon's orbit, which is known to be 500,000 miles. The mean distance of the moon from the earth is then calculated to be 237,000 miles.

It is true that balloons, in the first stage of their ascensions, have been the object of much research and discussion, and that many attempts have been made to reach the surface of the moon. There were, however, many objections to these attempts, and it was not until 1890 that a body was sent up into the stratosphere at an altitude of about 15 miles, and it was found that the body was uninjured. My implements were of three and three-quarters miles. Immediately beneath the eye of the moon's orbit being an ellipse of eccentricity amounting to no less than 0.05484.

The Ladies’ Swimming Entertainment.

The first aquatic entertainment of the season, given by the lady swimmers at the Palace, took place on Thursday last. No manipulation of a mechanical order was resorted to by the swimming missus, but the information furnished us enables us to say that Mrs. Noyes, with whom the event was largely in the water, and Miss Wristle Eels had charge of the proceedings, assisted by Miss Maitri. In the course of measuring Miss Eels and Miss A. Bagni illustrated what children can be taught to do in the water, the professionals, including a high dive from Miss Lilian Shmik & Miss Mila P. S. D., dive, bag of war, and saving drowning persons, were all gone through, and a highly enjoyable feat of swimming was performed at the conclusion of the proceedings. The swimming bath is reserved for the use of ladies each Tuesday, from 6 a.m. to 6 p.m.

Time Table of Classes.

SESSION 1889-90.

The Spring Term commenced on Thursday, April 7th, 1890. The Classes are open to both sexes of all ages. The Art Classes are held at Ewen House, Nile End Road, Cambridge. The afternoon classes for men and Sunday classes for women will be given in the gymnasium of the College, and the evening classes will be held in the Palace Institute. Students should show their names and addresses entertained exclusively for them in the Queen’s Hall on Wednesdays. Only those engaged in the particular cases at the times stated appear upon the Art School. Further details will be furnished upon application at the Office School. Teachers’ Evening will be held with the regular classes.

The workshops are equipped with suitable apparatus. The evening classes will be fully demonstrated with objects, by means of apparatus, etc. The Physical Laboratory will be used for the objects of the evening classes. Separate Laboratories and Class Rooms are provided for Male and Female Students. The Evening classes are open to all students.

The practical classes are limited to Members of the Art Classes, but will give preference to the Class Members of the Art Schools.

The Palace Journal.

May 21, 1890.

The view of the earth, at this period of my ascension, was beautiful indeed. The world below spread itself out before my eyes, and I could see the outlines of the continents as if by a telescope. The sea, so far as I could see, appeared to be a vast expanse of blue, and the clouds were scattered over the surface of the earth, as if by chance. The sun was shining brightly, and the air was clear and sweet. The horizon was visible, and I could see the outlines of the mountains and the valleys. The air was fresh and invigorating, and I felt that I could breathe more deeply than I ever had before. The view of the earth, at this period of my ascension, was beautiful indeed.
